VCG

Connectivity converged at a glance

Enabling powerful digital transformation and business resilience

At VCG, we believe connectivity is key to enabling powerful digital transformation and business resilience.

Whether this means transforming and securing your network, or simply knowing how connectivity can help accelerate the Cloud journey for your business, we help you understand and solve growing challenges and organisational milestones:
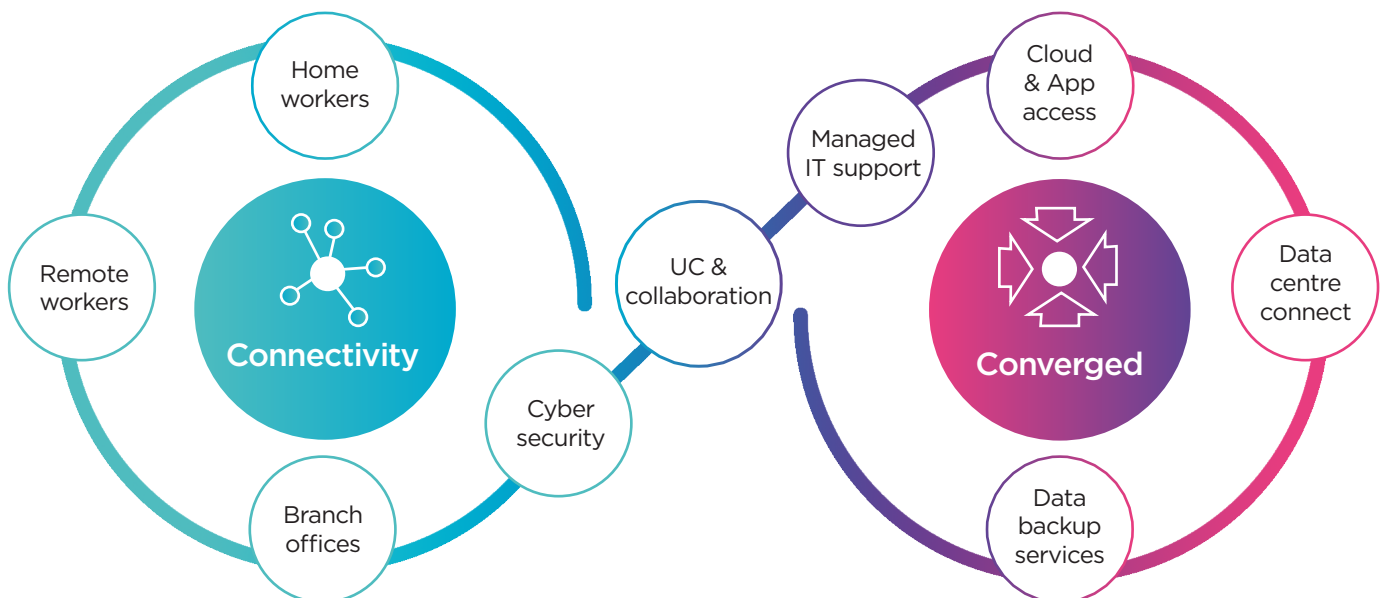

#Solvingtogether

- PSTN Migrations
- Network Security
- Single and multi-site connectivity
- Journey to the Cloud
- Distributed workforce challenges
- Support & network management

Your journey to the Cloud	Build a robust, modern, borderless network, and the most secure best-in-class technology for productivity, on premise or in the Cloud. **Our added service value to standard connectivity solutions means application performance, assurance and visibility are at the centre at your strategy**
Connecting and securing your distributed workforce	Access traditional fibre to the premise, radio or SD-WAN connectivity to suit your growth and data management needs. We enable your teams to **easily move workloads to the Cloud, with connectivity add-ons and services bringing all control and monitoring in just one dashboard.**
Unrivalled support and managed services	Become more resilient with 24 x 7 network monitoring, vendor management and visibility of events. Taking on as much as your teams need to **ensure connectivity without compromise.**

Our approach

We help you balance and simplify connectivity options and access to the Cloud, with integrated connectivity solutions, cloud-based services, security and observability options so you can manage, connect or control everything in just a few clicks.
